

EN GASTROENTERIC

LOW FAT[™]

CANINE FORMULA | FORMULE CANINE | FÓRMULA CANINA

The Power to Nutritionally Manage Your Dog with

Gastrointestinal Conditions and Difficulty Digesting Fat

Gastrointestinal upset is one of the most common reasons dogs are brought to a veterinarian. Some dogs have gastrointestinal conditions which lead to difficulty digesting fat (hyperlipidemia, lymphangiectasia, pancreatitis, etc). For these dogs, Purina[®] Pro Plan[®] Veterinary Diets EN Gastroenteric Low Fat[™] Canine Formulas are ideal options as they are low in fat, have a high total digestibility to promote nutrient absorption, and contain high-quality ingredients, including a prebiotic fiber to help support digestive health.

Advanced Nutrition

Low in fat for dogs who have difficulty digesting fat

High total digestibility to promote nutrient absorption

Contains prebiotic fiber to help support digestive health

EN Gastroenteric Low Fat[™] can be used in the nutritional management of dogs with:

- Hyperlipidemia
- Lymphangiectasia
- Pancreatitis
- Protein-losing enteropathy
- Inflammatory bowel disease
- Exocrine pancreatic insufficiency
- Vomiting and diarrhea

Our commitment to you and your pets

Purina[®] Pro Plan[®] Veterinary Diets is committed to helping you and your veterinarian make a true difference in your pet's life. Our diets are backed by extensive testing and scientifically formulated to help nutritionally manage dogs and cats with certain medical conditions.
