

HA **HYDROLYZED[™]**
 CANINE FORMULA | FELINE FORMULA

The Power to Nutritionally Manage Your Dog or Cat with

Food Intolerance

A food intolerance generally appears as gastrointestinal upset or intense itching or scratching. This can develop at any time—even after years of eating a food without problems. The culprit is usually a common protein source such as beef or dairy, but dogs and cats can become allergic to any such ingredient. Purina[®] Pro Plan[®] Veterinary Diets HA Hydrolyzed[™] Canine and Feline Formulas are highly digestible and contain hydrolyzed protein. Hydrolyzed protein is protein that has been broken down into small components, which are less likely to cause a negative response in food-sensitive dogs and cats.

Advanced Nutrition

Only hydrolyzed protein sources

Single carbohydrate source

Highly digestible for optimal nutrient absorption

This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals in cats

HA Hydrolyzed[™] can be used in the nutritional management of dogs and cats with:

- Food allergic gastroenteritis
- Food allergic dermatitis
- Food intolerance
- Chronic non-specific diarrhea or vomiting

Our commitment to you and your pets

Purina[®] Pro Plan[®] Veterinary Diets is committed to helping you and your veterinarian make a true difference in your pet's life. Our diets are backed by extensive testing and scientifically formulated to help nutritionally manage dogs and cats with certain medical conditions.
