

NF **KIDNEY FUNCTION[®]**
 CANINE FORMULA | FELINE FORMULA

The Power to Nutritionally Manage
 Dogs and Cats with
Kidney Disease

It's estimated that 9 in every 1,000 dogs and 16 in every 1,000 cats suffer from kidney disease.¹ It can occur in dogs and cats of all ages, but is usually a disease of older pets. Kidney disease is usually a progressive disorder that can't be cured, but medical treatment and dietary management may help make your pet more comfortable. Purina[®] Pro Plan[®] Veterinary Diets NF Kidney Function[®] Canine and Feline Formulas were developed to help minimize the signs of kidney failure and help slow the progression of the disease.

Advanced Nutrition

Restricted amount of high-quality protein

Low phosphorus to help support the kidneys

Reduced sodium

Added B-complex vitamins

1. Blackwell's five-minute veterinary consult, canine and feline, 2011; Renal Failure, Chronic, Pg 1095

NF Kidney Function[®] can be used in the nutritional management of dogs and cats with:

- Chronic renal failure
- Hepatic disease associated with encephalopathy
- Conditions benefiting from moderate sodium restriction

Our commitment to you and your pets
