

The Power to Nutritionally Manage Your Dog with **Urinary Conditions**

Urinary conditions are common in dogs. Two of the most common are urinary tract infections and urinary stones. Purina[®] Pro Plan[®] Veterinary Diets UR Urinary[®] Ox/St[™] Canine Formula is formulated to help reduce the risk of urinary stone recurrence in dogs. If your dog has a urinary tract infection, your veterinarian will also prescribe an antibiotic for your pet.

Advanced Nutrition

- To help dissolve sterile struvite uroliths*
- To help reduce the risk of calcium oxalate urolith recurrence
- To help reduce the risk of sterile struvite urolith recurrence*

*Most struvite uroliths in dogs are caused by urinary tract infections (UTI). In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

UR Urinary[®] Ox/St[™] can be used to help in the nutritional management of the following:

- Lower urinary stone associated with LUTD
- Dissolution of sterile struvite stones*
- As a complement to antibiotics in the dissolution of infection-induced struvite stones*
- Reducing the risk of calcium oxalate or sterile struvite stone recurrence

Our commitment to you and your pet

Purina Pro Plan Veterinary Diets is committed to helping you and your veterinarian make a true difference in your pet's life. Our diets are backed by extensive testing and scientifically formulated to help nutritionally manage dogs and cats with certain medical conditions.

The science behind our therapeutic diets represents a collaboration between Purina nutritionists, researchers and veterinarians, resulting in proven nutritional breakthroughs and great-tasting formulas produced with high safety standards.

Ask your veterinarian about **UR Urinary[®] Ox/St[™]** today. For your pet's health, please see your veterinarian regularly.

Refer to the backside of your product package for feeding instructions.
