 FELINE FORMULA

The Power to Nutritionally Manage Your Cat with
Gastrointestinal Conditions

Gastrointestinal upset is one of the most common reasons cats are brought to a veterinarian. GI upset, which can be caused by many factors such as parasites or infectious agents, generally impairs a cat's ability to digest and absorb nutrients. Purina® Pro Plan® Veterinary Diets EN Gastroenteric® Feline Formulas are for the nutritional management of cats and kittens with GI upset. These diets utilize a high protein, low carbohydrate approach for cats' unique needs.

Advanced Nutrition

High protein and low carbohydrate to help support gastrointestinal health

Moderate fat for energy

Highly digestible protein for optimal nutrient absorption

These diets promote a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals

EN Gastroenteric® can be used in the nutritional management of cats with:

- Gastritis and enteritis
- Vomiting and diarrhea
- Hepatic lipidosis
- Pancreatitis
- Inflammatory Bowel Disease

Our commitment to you and your pets

Purina® Pro Plan® Veterinary Diets is committed to helping you and your veterinarian make a true difference in your pet's life. Our diets are backed by extensive testing and scientifically formulated to help nutritionally manage dogs and cats with certain medical conditions.

The science behind our therapeutic diets represents a collaboration between Purina nutritionists, researchers and veterinarians, resulting in proven nutritional breakthroughs and great-tasting formulas produced with high safety standards.

Ask your veterinarian about EN Gastroenteric® today. For your pet's health, please see your veterinarian regularly.

Refer to the backside of your product package for feeding instructions.

Actual kibble size
