

UR URINARY[®] St/Ox[®]
FELINE FORMULA

The Power to Nutritionally Manage Your Cat with
Lower Urinary Tract Disease

Feline Lower Urinary Tract Disease (FLUTD) is a common condition seen in cats. FLUTD is a group of diseases that can affect the urinary bladder or the urethra. Purina[®] Pro Plan[®] Veterinary Diets UR Urinary[®] St/Ox[®] Feline Formulas are scientifically formulated to meet the special dietary needs of adult cats that are predisposed to lower urinary tract conditions, as well as provide the complete and balanced nutrition they need to thrive every day.

Advanced Nutrition

Promotes increased urine volume (dry diet only)

Promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals

- Turkey & Giblets Recipe in Sauce is a low calorie option

UR Urinary[®] St/Ox[®] can be used in the nutritional management of adult cats with the following conditions:

- Lower urinary tract disease
- Sterile struvite stones
- History of calcium oxalate stones
- Idiopathic cystitis

Our commitment to you and your pet
